its time for change. mores code should of been gone years ago.all it is doing is holding ham radio back from becoming bigger a better.if it was not for change we would not have the great radios we have today.or computers and all the other great things we have today to use.and mores code is a mod of its own and should not be a requirement for your test.and if we dont make it bigger and better we may lose some of the bands.if things dont change i fear ham radio will be gone.HAM RADIO COULD BE GREAT IF WE HAVE CHANGE.AND DO AWAY WITH THE CODE TESTING.
